Ownership
Matthew Dumag

I'm responsible for implementing and testing the following classes for PlanItPokerMQ:

mqtt.MqttClientWrapper

mqtt.EventPublisher

mqtt.EventSubscriber

mqtt.BaseEvent

mqtt.JoinGameEvent

mqtt.CreateRoomEvent

mqtt.EstimateSubmittedEvent

mqtt.RevealCardsEvent

mqtt.ResultsBroadcastEvent

App.java

I was without a group and only had my existing code for the Planit-Poker assignment. I created these classes on my own, simply, while meeting requirements. It's formatted as if I was in a group (There are missing components from the original Planit-Poker assignment).
